| 25BCA0248 | ILAYARAJA L          | 3 |

### Question Number -1

A college maintains the academic records of its students. Write a Java program using decision-making statements to read the marks obtained in five subjects and validate that each mark is between 0 and 100. Calculate the total marks, average, and percentage of the student. Assign grades based on the percentage obtained as A+ (90–100), A (80–89), B (70–79), C (60–69), D (50–59), and F (below 50). Determine whether the student has passed by securing at least 50 marks in every subject or failed if any subject has less than 50 marks. If the student secures more than 95% and passes all the subjects, display the message **"Eligible for Merit Scholarship."** If the student fails in more than two subjects, display the message **"Semester Re-registration Required."** Finally, display the complete student report containing all the calculated details.

**Sample Input/Output:**

Enter Student Name: Karthik  
Enter marks for Subject 1: 45  
Enter marks for Subject 2: 38  
Enter marks for Subject 3: 60  
Enter marks for Subject 4: 42  
Enter marks for Subject 5: 35

----- Student Academic Report -----

Student Name : Karthik  
Subject 1 Mark : 45  
Subject 2 Mark : 38  
Subject 3 Mark : 60  
Subject 4 Mark : 42  
Subject 5 Mark : 35  
Total Marks : 220  
Average Marks : 44.0  
Percentage : 44.0%  
Grade : F  
Result : Failed  
Message : Semester Re-registration Required.

**Question Number -2**

A supermarket wants to automate bill calculation. Write a Java program that accepts the item cost, discount amount, an arithmetic operator (+ or -), and the customer type (Member or Guest). Use a switch statement to calculate the final bill amount after validating the operator. Ensure that the final bill cannot become negative. Determine whether the final bill is positive, negative, or zero. If the customer type is Member, display "Excellent Savings" when the discount exceeds 1000, "Good Savings" when it is between 500 and 1000, and "Regular Savings" otherwise. Finally, display all the entered values, the calculation performed, the final bill, the result type, and the evaluation message.

**Sample Output -1:**

Enter Item Cost: 5000  
Enter Discount Amount: 1200  
Enter Operator (+ or -): -  
Enter Customer Type (Member/Guest): Member

===== Shopping Bill Report =====

Item Cost : 5000.0  
Discount Amount : 1200.0  
Operator : -  
Customer Type : Member  
Operation : 5000.0 - 1200.0  
Final Bill : 3800.0  
Result Type : Positive  
Evaluation : Excellent Savings

**Sample Output -2:**

Enter Item Cost: 500  
Enter Discount Amount: 700  
Enter Operator (+ or -): -  
Enter Customer Type (Member/Guest): Member

Error: Final bill cannot be negative.

**Question Number -3**

A university maintains placement records of its final-year students. Write a Java program using decision-making statements to read the student's CGPA, Aptitude Test Score, Technical Test Score, Communication Skill Score, and Attendance Percentage. Validate that the CGPA is between 0 and 10 and all other scores are between 0 and 100. Calculate the overall performance percentage and assign grades based on the percentage obtained as A+ (90–100), A (80–89), B (70–79), C (60–69), D (50–59), and F (below 50). Determine the placement eligibility of the student by verifying that the student has secured a CGPA of 7.0 or above, obtained a minimum score of 60 marks in Aptitude, Technical, and Communication Skill tests, and maintained an attendance percentage of at least 75%. If the student has CGPA above 9.0 and scores above 90 in all skill tests, display "Eligible for Dream Company Recruitment." If the student fails in more than two eligibility conditions, display "Placement Training Mandatory." Finally, display the complete Student Placement Report containing all input details, percentage, grade, and placement status.

**Sample output:**

Enter Student Name: Arun Kumar  
Enter CGPA: 8.5  
Enter Aptitude Test Score: 85  
Enter Technical Test Score: 90  
Enter Communication Skill Score: 80

Enter Attendance Percentage: 92

----- Student Placement Report -----

Student Name : Arun Kumar

CGPA : 8.5

Aptitude Test Score : 85

Technical Test Score : 90

Communication Score : 80

Attendance Percentage : 92%

Overall Percentage : 86.75%

Grade : A

Placement Status : Eligible for Campus Placement.
