UACSA101 - Programming in Python Assessment 4

Perform the following functions using for, while, nested loop:

1. Write a Python program to print the numbers 1, 3, 7, 15, ..n
2. Write a Python program to find sum of odd and even numbers from 1 to n.
3. Write a Python program to check whether a number is Prime or not.
4. Write a Python program to reverse a given number.
5. Write a Python program to find sum of squares of the digits of the given number.
6. Write a Python program to generate the Fibonacci series up to n terms using a for loop.
7. Write a Python program to print the multiplication table of a given number using a for loop.
8. Write a Python program to print numbers from 1 to n, skipping multiples of 3 using the continue statement.
9. Print the following pattern

```
1
2  2
3  3  3
4  4  4  4
```
